

Fluency outsourced business solutions

Fluency simplifies the accounting process for businesses operating in multiple territories. We provide outsourced accounting and administrative support that streamlines our clients' international accounting functions into one point of access.

About our service

Our service is coordinated and managed by one central team of contacts in the UK who understand your business and speak your language. This saves our clients considerable management time by eliminating the need to recruit and train specialist in-house accounting teams.

Consolidated financial reports are accessible through our online accounting portal which is a completely secure network so clients can be assured of the safety of their financial information. The system allows for global access to financial reports, requiring only Internet Explorer and an access token, 24 hours a day.

International reach

We have dedicated partner firms in locations around the world who collect and collate the financial information from our clients' worldwide operations. These partner firms draw on their knowledge of accounting and legislative requirements to identify tax compliance issues at a local level. The financial data is then entered onto Fluency's online accounting system where it is processed into the client's required reporting format. This is all overseen by Fluency's central management in the UK.

Deliverables

The reports are produced in a format that is tailored to the needs of individual clients, taking into account local accounting regulations. We can produce consolidated group reports as well as individual subsidiary reports in the local language and currency. All reports can be downloaded from Fluency's online accounting portal and access can be controlled on a hierarchical basis.

Service quality

Our systems are SAS 70 Type II accredited meaning businesses that are governed by Sarbanes-Oxley legislation can rely on the quality of our services.

Our history

Fluency evolved from the expertise already existing within Blick Rothenberg and BRAL Limited. Blick Rothenberg is a leading, independent firm of chartered accountants that has been assisting international businesses for over 65 years. Furthermore, BRAL has been providing outsourced accounting and administrative support to over 1,500 businesses in its 25 years of operating. Over 90% of these businesses have been the subsidiaries of overseas owned groups. Taking into account this international capability, it was a natural progression to form Fluency and provide outsourced accounting services in territories beyond the UK.
